

RideWell FleetSM – Comprehensive Features. Preferential Pricing.

Azuga is providing Cincinnati Insurance policyholders fleet-tracking telematics at preferred pricing.

Full-Suite of Features Come Standard

The standard package provides access to a full suite of fleet-tracking services for \$17/device/month, on a one-year term. This package supports both your risk management and operational business objectives.

Service Includes:

- Telematics' plug and play device
- Fleet access to Azuga portal
- Driver scoring
- Driver and fleet manager smart phone app
- Preferred fleet customer support
- Initial set-up and training
- Daily data feed

Custom reporting and more

Add-On Features Available

Add-ons are available at discounted prices to enhance your telematic program and consist of the following:

<i>Solution</i>	<i>Discounted Upfront Price</i>	<i>Discounted Monthly Price</i>
Field Service Management	N/A	\$30/driver and \$50/user
This is a premium feature add-on for our FSM solution that supports a broad range of functionality including scheduling/dispatching, time management, work order management, contact management, billing management and more.		
Distracted Driving Mobile Application	N/A	\$2.50/driver
This is a premium feature add-on to the mobile application that enables customers to better manage distracted driving behavior of their mobile workforce. Capabilities differ by phone operating system. Policy monitoring is supported on Apple devices (you are able to view the phone usage) and policy enforcement is supported on Android devices (you are able to restrict phone usage in a highly configurable manner). Please refer to the datasheet for more information.		
Driver Identification Mobile Application	N/A	\$2.25/driver
This is a premium feature add-on to the mobile application that enables customers to positively identify the mobile worker driving each vehicle. The mobile application communicates directly with the Azuga device in the vehicle to identify the driver without the driver needing to take any action other than to be logged on to the application. Please refer to the datasheet for more information.		
Driver Identification Beacon Card	\$15.00	\$1.50/driver
This solution enables customers to positively identify the mobile worker driving each vehicle through the deployment of a credit card-sized plastic card. The card identifies the driver by communicating a driver-specific code to the Azuga device in the vehicle via Bluetooth. No action is required by the driver other than to have the card present, typically in their wallet or employee badge holder. Please refer to the datasheet for more information.		

Solution**Discounted Upfront Price****Discounted Monthly Price****Preventative Maintenance Application****N/A****\$1.99/vehicle**

This powerful utility enables customers to proactively manage their maintenance events through miles, engine hours or time-based metrics. In addition, maintenance records and receipts can be uploaded to the system to support a comprehensive maintenance program. Please refer to the datasheet for more information.

Roadside Assistance**N/A****\$2.50/vehicle**

Delivered through a roadside service contractor, this program supports drivers with disabled vehicle events with services like towing, battery jump, tire change and more. Please refer to the datasheet for more information.

Electronic Logs Application**N/A****\$17.00/driver**

This utility supports customers whose drivers need to comply with government mandates regarding hours of service. Please refer to the datasheet for more information.

One-Minute Tracking**N/A****\$1.79/vehicle**

This utility enables customers to achieve more frequent GPS location data to enhance their reporting and analytics data. This enhancement can be set at 60- or 30-second polling intervals.

15-Second Tracking**N/A****\$3.00/vehicle**

This utility enables customers to achieve more frequent GPS location data to enhance their reporting and analytics data.

Azuga Coach**N/A****\$3.15/driver**

Training videos are sent to any driver whose driver behavior the week prior put them in the risky driver zone. Tests need to be taken to measure comprehension after each lesson. Managers measure training compliance through the portal view.

Azuga SafetyCam Solution -**Forward-Only or Dual-Facing Configuration****\$155.00 (includes Y cable, OBD Power Kit)****\$23.00/vehicle**

This utility enables customers to view live video footage of the road situation and driver (dual facing) awareness at the point that a risky driving event occurred. Benefits are numerous: from driver coaching to liability protection through definitive information from video capture. Please refer to the datasheet for more information. Solution is entirely plug and play by using the OBD port power connector.

Azuga SafetyCam AI Solution -**Dual-Facing Configuration****\$230.00 (includes Y cable, OBD Power Kit)****\$27.00/vehicle**

This premium utility enables customers to view live video footage of the road situation and driver (dual facing) awareness at the point that a risky driving event occurred as well as distracted driving events by monitoring the driver's behavior. Benefits are numerous: from driver coaching to liability protection through definitive information from video capture. Please refer to the datasheet for more information. Solution is entirely plug and play by using the OBD port power connector.
