

# iTrainStation

Built For The Next  
Generation Of Training...

## “Better Training Leads To Increased Productivity and Reduced Costs”

### What is iTrainStation...

- A web based learning platform with four unique levels of service.
- An intuitive, easy to use graphical interface enhances the learning experience improving levels of comprehension.
- A robust reporting engine that includes automated, scheduled reporting capabilities.
- Technical Support for all users included with all service levels at no additional charge.

### Pay Per View...

- Specially designed for organizations with lending libraries.
- Each member can obtain access while maintaining strict control over the amount of use and the budget.

### Platform Plus...

- Integrate the Platform into your own web portal creating a trusted environment for employee learning.
- The 3 dimensional user management offers complete flexibility in creating groups for in-depth control of scheduled training.

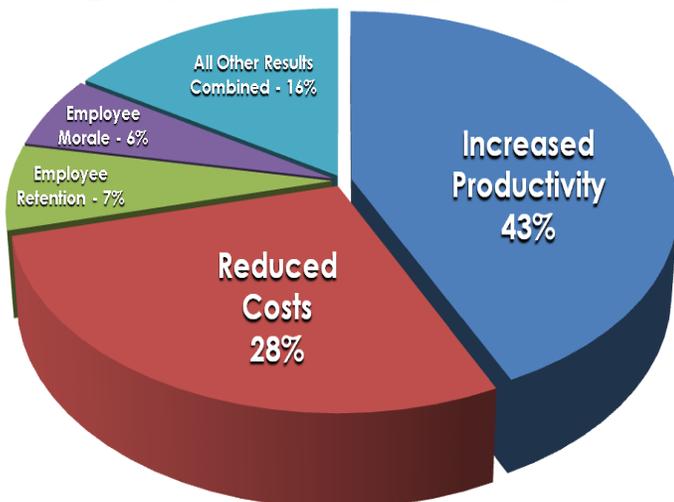

### Classic Service...

- Think Netflix® for the corporate world.
- Designed for traditional classroom style training.
- So much automation that it's like having a free employee doing all the work for you.

### LMS Lite...

- An affordable entry level LMS for small to medium sized organizations.
- Assign a course to a group of individuals, or a group of courses to an individual.

# Cost Effective Solutions To Train Any Need In Any Environment...

## Key Features...

- A web based training system that has been under daily development since 2006.
- Configurable solutions that are designed to offer the greatest amount of functionality for even the most budget conscious of organizations.

- Easily upgrade to enhanced services without loss of data.
- The entire project has been developed and managed in house, offering precise control over functionality and enhancements.
- There are no third party developers involved, allowing for user requested enhancements to be implemented immediately.
- Implementation of user requested features, suggestions and ideas is why this Learning System is being called, **"The Platform"**.
- Platform enhancements become a shared benefit to the entire user community without any additional costs.
  - A robust, flexible and scalable system built on a concept of 'switches' allowing for an infinite array of configurations, functions and detailed control over organizational training.
  - A rare solution that also includes a very large selection of quality content not found in most Learning Management Systems.
- New stimulating, quality content is added regularly.
- Programs are reviewed for quality and adherence to current compliance standards.
- All courses come equipped with a quiz, providing an essential benefit to trainers.
- Organizations can customize the quiz making their own individual learning experience unique and specific to their own environments.
- A simple, easy to use Course Editor is built in—eliminating the need for expensive, difficult to use software.
- The Platform offers trainers the ability to incorporate their own private content.
- Engineered to be compatible with the technologies of the past as well as the mobile computing needs of the future.
- No need to install any special apps or programs - the perfect solution for secure networks and environments.
