#### 1. Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The financial statements of The Cincinnati Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual (NAIC SAP), version effective January 1, 2001 and updates through the current year have been adopted as a component of prescribed or permitted practices by the state of Ohio.

The Company has no prescribed or permitted practices that would result in differences between the NAIC SAP and the state of Ohio basis, as shown below as of September 30, 2019 and December 31, 2018:

- B. Use of Estimates in the Preparation of the Financial Statements No significant change
- C. Accounting Policies
  - 6. Loan-backed and structured securities with an NAIC designation 1 or 2 are stated at amortized cost. Loan-backed and structured securities with an NAIC designation 3 through 6 are stated at the lower of amortized cost or fair value, with the difference reflected in assigned surplus. Amortized cost of loan-backed and structured securities is determined using the retrospective adjustment method, except for those which an other-than-temporary impairment has been recognized, which use the prospective adjustment method to determine amortized cost.

#### D. Going Concern

After review of the Company's financial condition, management has no doubts about the Company's ability to continue as a going concern.

- 2. Accounting Changes and Correction of Errors No significant change
- 3. Business Combinations and Goodwill Not applicable
- 4. Discontinued Operations Not applicable
- 5. Investments
  - A. Mortgage Loans Not applicable
  - B. Debt Restructuring Not applicable
  - C. Reverse Mortgages Not applicable
  - D. Loan-Backed Securities
    - 1. The Company obtains prepayment assumptions from third-party vendors.
    - 2. The Company recognized no other-than-temporary impairments for loan-backed and structured securities due to the intent to sell or the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the quarter and nine months ended September 30, 2019.
    - 3. The Company recognized no other-than-temporary impairments due to the present value of cash flows expected to be collected being less than the amortized cost basis for loan-backed and structured securities during the quarter and nine months ended September 30, 2019.
    - 4. The following table presents the aggregate total of all impaired loan-backed and structured securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

| The aggregate amount of unrealized losses:                     |         |
|--|---------|
| Less than 12 months  | \$<br>0 |
| 12 months or longer  | 0       |
|  |         |
| The aggregate related fair value of securities with unrealized |         |
| losses:  |         |
| Less than 12 months  | \$<br>0 |
| 12 months or longer  | 0       |

- 5. The Company performs a quarterly analysis to assess whether the decline in the fair value of any loan-backed or structured security is other-than-temporary. Factors considered in determining whether a decline in fair value is considered other-than-temporary included the length of time and the extent to which the fair value of the security has been below cost or amortized cost and changes in credit ratings of the issue during the period. The intent to sell, the intent and ability to hold the security for a period of time sufficient to recover its cost or amortized cost basis and the ability to recover all outstanding amounts when contractually due are also considered. Based upon this analysis the Company believes there were no indications of declines in fair value that were considered to be other-than-temporary for any loan-backed or structured securities with unrealized losses as of September 30, 2019.

#### D. Reconciliation of Federal Income Tax Rate to Actual Effective Rate

The provision for federal income taxes incurred is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes. The significant items causing this difference are as follows:

#### E. Operating Loss and Tax Credit Carryforwards

At September 30, 2019 the Company had no net operating loss carryforwards or capital loss carryforwards.

The following is income tax expense for the current and prior years that is available for recoupment in the event of future net losses:

| Year  | Ordinary       | Capital       | Total          |
|-------|----------------|---------------|----------------|
| 2019  | \$ 61,029,699  | \$ 113,258    | \$ 61,142,957  |

| 2017  | 0              | 0             | 0              |
| Total | \$ 187,283,900 | \$ 26,369,188 | \$ 213,653,088 |

At September 30, 2019 the Company had no protective tax deposits under Section 6603 of the Internal Revenue Code.

#### F. Consolidated Federal Income Tax Return

1. The Company's federal income tax return is consolidated with the following entities:

Cincinnati Financial Corporation (Parent)

The Cincinnati Life Insurance Company

The Cincinnati Casualty Company

The Cincinnati Indemnity Company

The Cincinnati Specialty Underwriters Insurance Company

**CFC Investment Company** 

CSU Producer Resources, Inc.

2. The method of allocation between the companies is subject to a written agreement, approved by the Board of Directors, whereby allocation is made primarily on a separate return basis, with the company receiving a current benefit for losses generated to the extent federal taxes are reduced for the consolidated tax group.

#### G. Federal or Foreign Income Tax Loss Contingencies

The Company did have tax contingencies under the principles of SSAP No. 5, *Liabilities, Contingencies and Impairment of Assets*. As of September 30, 2019, we had a gross unrecognized tax benefit of \$31.4 million. This amount carried is for an unrecognized tax benefit for 2018. The entire amount of our liability, if recognized, would impact the effective tax rate. We believe that it is reasonably possible that a decrease for the full amount of our \$31.4 million of unrecognized benefits, all of which relates to our tax base insurance claims and reserve deduction, may be necessary within the coming year. Such a decrease is possible when the IRS processes our income tax return filing for the 2018 tax year. This gross unrecognized tax benefit of \$31.4 million has been netted for a final current federal and foreign income tax receivable of \$29.8 million. The Company is primarily subject to examination by U.S. federal and various U.S. state and local tax authorities. The statute of limitations for federal tax purposes has closed for tax years 2015 and earlier. The statute of limitations for state income tax purposes has closed for tax years 2015 and earlier. During third quarter of 2019, the IRS notified us they would be examining tax year ended December 31, 2017.

- 20. Fair Value Measurements
  - A. Inputs Used for Assets and Liabilities Measured at Fair Value
    - 1. Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain fixed maturities and preferred stock, when carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The Company does not have any material liabilities carried at fair value.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level that is significant to the fair value measurement of the instrument.

Financial assets that fall within Level 1 and Level 2 are priced according to observable data from identical or similar securities that have traded in the marketplace. Also within Level 2 are securities that are valued by outside services or brokers where the Company has evaluated the pricing methodology and determined that the inputs are observable. Financial assets that fall within Level 3 of the hierarchy are valued based upon unobservable market inputs. Pricing for each Level 3 security is based upon inputs that are market driven, including third-party reviews provided to the issuer or broker quotes. However, the Company places in the Level 3 hierarchy securities for which it is unable to obtain the pricing methodology or it could not consider the price provided as binding. Management ultimately determines the fair value for each Level 3 security that it considers to be the best exit price valuation.

The Company primarily bases fair value estimates for investments in equity and fixed-maturity securities on quoted market prices or on prices from a nationally recognized pricing vendor, an outside resource that supplies global securities pricing, dividend, corporate action and descriptive information to support fund pricing, securities operations, research and portfolio management. The Company obtains and reviews the pricing service's valuation methodologies and related inputs and validates these prices by replicating a sample across each asset class using a discounted cash flow model. When a price is not available from these sources, as in the case of securities that are not publicly traded, the Company determines the fair value using various inputs including quotes from independent brokers. In these circumstances, the Company has generally obtained and evaluated two nonbinding quotes from brokers; its investment professionals determine the best estimate of fair value. The fair value of investments not priced by a pricing vendor is less than 1 percent of the fair value of the Company's total investment portfolio.

Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

Level 1—Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in active markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.

Level 2 – Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets and liabilities that are actively traded. This also includes pricing models for which the inputs are corroborated by market data.

The technique used for the Level 2 fixed-maturity securities, including surplus notes which are included in other invested assets, is the application of market based modeling. The inputs used for all classes of fixed-maturity securities in the table below include relevant market information by asset class, trade activity of like securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates, U.S. Treasury or swap curves, yield to maturity and economic events. Specific to commercial mortgage-backed securities, key inputs also include prepayment and default projections based on past performance of the underlying collateral and current market data. Level 2 fixed-maturity securities are primarily priced by a nationally recognized pricing vendor.

The Level 2 preferred equities technique used is the application of market based modeling. The inputs used, similar to those used by the pricing vendor for our fixed-maturity securities, include relevant market information, trade activity of like securities, yield to maturity, corporate action notices and economic events. All of the Level 2 preferred equities are priced by a nationally recognized pricing vendor.

Level 3—Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include the following:

- Quotes from brokers or other external sources that are not considered binding;
- Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price; or
- Quotes from brokers or other external sources where the inputs are not deemed observable.

The following table presents the Company's assets measured and reported at fair value by level within the fair value hierarchy as of September 30, 2019:

#### 22. Subsequent Events

The Company has considered subsequent events through November 14, 2019, the date of issuance of these statutory financial statements. There were no events occurring subsequent to September 30, 2019, which may have a material effect on the Company.

- 23. Reinsurance No significant change
- 24. Retrospectively Rated Contracts & Contracts Subject to Redetermination Not applicable
- 25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2018 were \$5,123,807,341. As of September 30, 2019, \$1,339,314,906 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$3,615,670,885 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on commercial casualty lines of insurance. Therefore, there has been \$168,821,550 of favorable prior-year development since December 31, 2018 to September 30, 2019. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Because the Company does not write retrospectively rated policies, prior-year development does not affect premium adjustments.

There were no changes in methodologies and assumptions used in calculating the reserve for loss and loss adjustment expenses at September 30, 2019.
