The Inflation Reduction Act (Tax Act) was enacted on August 16, 2022 and generally went into effect January 1, 2023. Along with other changes, the Tax Act created a new corporate alternative minimum tax (CAMT) for certain corporations based on 15% of adjusted financial statement income for the taxable year. The effective date of this provision was January 1, 2023. We are an “applicable corporation” for purposes of the CAMT in 2023. Due to the lack of current guidance available, we are not able to make a reasonable estimate as to whether we will have a CAMT liability. As a result, the third quarter 2023 financial statements do not include an estimated impact of the CAMT.

20. **Fair Value Measurements**

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain fixed maturities and preferred stock, when carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The Company does not have any material liabilities carried at fair value.

Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1—Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in active markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.
- Level 2 – Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets and liabilities that are actively traded. This also includes pricing models for which the inputs are corroborated by market data. The technique used for the Level 2 fixed-maturity securities is the application of market-based modeling. The inputs used for all classes of fixed-maturity securities listed in the table below include relevant market information by asset class, trade activity of like securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates, U.S. Treasury or swap curves, yield to maturity and economic events. Level 2 fixed-maturity securities are primarily priced by a nationally recognized pricing vendor.
- Level 3—Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include the following:
 - Quotes from brokers or other external sources that are not considered binding;
 - Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price; or
 - Quotes from brokers or other external sources where the inputs are not deemed observable.

NOTES TO FINANCIAL STATEMENTS

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level that is significant to the fair value measurement of the instrument.

Financial assets that fall within Level 1 and Level 2 are priced according to observable data from identical or similar securities that have traded in the marketplace. Also within Level 2 are securities that are valued by outside services or brokers where the Company has evaluated the pricing methodology and determined that the inputs are observable. Financial assets that fall within Level 3 of the hierarchy are valued based upon unobservable market inputs. Pricing for each Level 3 security is based upon inputs that are market driven, including third-party reviews provided to the issuer or broker quotes. However, the Company places in the Level 3 hierarchy securities for which it is unable to obtain the pricing methodology or it could not consider the price provided as binding. Management ultimately determines the fair value for each Level 3 security that it considers to be the best exit price valuation.

The Company primarily bases fair value estimates for investments in equity and fixed-maturity securities on quoted market prices or on prices from a nationally recognized pricing vendor, an outside resource that supplies global securities pricing, dividend, corporate action and descriptive information to support fund pricing, securities operations, research and portfolio management. The Company obtains and reviews a price comparison report that includes prices from multiple industry leading pricing sources. When a price is not available from these sources, as in the case of securities that are not publicly traded, the Company determines the fair value using various inputs including quotes from independent brokers. In these circumstances, the Company has generally obtained and evaluated two nonbinding quotes from brokers; its investment professionals determine the best estimate of fair value. The fair value of investments not priced by a pricing vendor is less than 1 percent of the fair value of the Company’s total investment portfolio.

The following table presents the Company’s assets measured and reported at fair value by level within the fair value hierarchy as of September 30, 2023:

Assets at Fair Value:

| | Level 1 | Level 2 | Level 3 | Net Asset Value (NAV) Included in Level 2 | Total |
|--------------|----------------|---------------|---------|---|----------------|
| Bonds | \$ 0 | \$ 42,290,683 | \$ 0 | \$ 0 | \$ 42,290,683 |
| Common Stock | 262,246,617 | 0 | 0 | 0 | 262,246,617 |
| Total | \$ 262,246,617 | \$ 42,290,683 | \$ 0 | \$ 0 | \$ 304,537,300 |

3. Transfers between levels are assumed to occur at the beginning of the period.
4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values – See narrative in Note 20A1.

NOTES TO FINANCIAL STATEMENTS

25. Changes in Incurred Losses and Loss Adjustment Expense

- A. Reserves as of December 31, 2022 were \$731,329,494. As of September 30, 2023, \$119,985,856 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$597,778,390 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on commercial casualty lines of insurance. Therefore, there has been \$13,565,248 of favorable prior-year development since December 31, 2022 to September 30, 2023. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Because the Company does not write retrospectively rated policies, prior-year development does not affect premium adjustments.
- B. There were no changes in methodologies and assumptions used in calculating the reserve for loss and loss adjustment expenses at September 30, 2023.
